WARNING SIGNS CARD

Seizure first aid

Stay, keep safe, roll to the side

Do

- Stay calm and note the time it starts
- Move hard or sharp objects away
- Cushion their head
- Loosen anything tight around the neck
- When the jerking stops, roll them onto their side
- Stay with them until they are fully awake

Don't

- Put anything in their mouth
- Hold them down
- Give food or water until they are fully alert
- Use onions, shoes or keys

Call 112 or 108 if

- It lasts more than 5 minutes
- Another seizure starts before they wake up
- It is their first ever seizure
- They are injured, pregnant or have diabetes
- They have trouble breathing afterwards
- It happened in water

Emergency: 112 · Ambulance: 108
